

Subscription Splitter

Coding Standard

Naming:

1. Variables start with lowercase and followed by camelCase

Must be meaningful to what its used for

For example:

```
var apple
```

```
var bigApple
```

2. Functions start with lowercase and followed by camelCase

Must be meaningful to what its used for

For example:

```
function doStuff()
```

```
function write()
```

3. Classes are written in UpperCamelCases

For example

```
class MyClass
```

4. Routing

Names have to represent the route that it goes

Spacing:

- Tabs are 1 tab by keyboard
- New line between functions
