

Product Name: Split

Team Name: Subscription Splitter

Sprint Completion Date: March 4, 2018

Sprint 2 Plan

Goal: Implement main functionalities regarding listings and integrate Firebase social authentication information with MongoDB database.

Tasks:

User Story 1: As a developer, I need to ensure an easy workflow for the user to search for groups and join.

- Set up MongoDB database storage [10]
- Integrate Firebase with MongoDB [5]
- Work on improving UI for listings [10]

User Story 2: As a user, I need to understand what plans are offered for each subscription service to help in my decisions.

- Display subscription plans for each service on listings page [2]
- Allow filters on groups that also want the same plans [5]

Total Hours: 32 hours

Team Role:

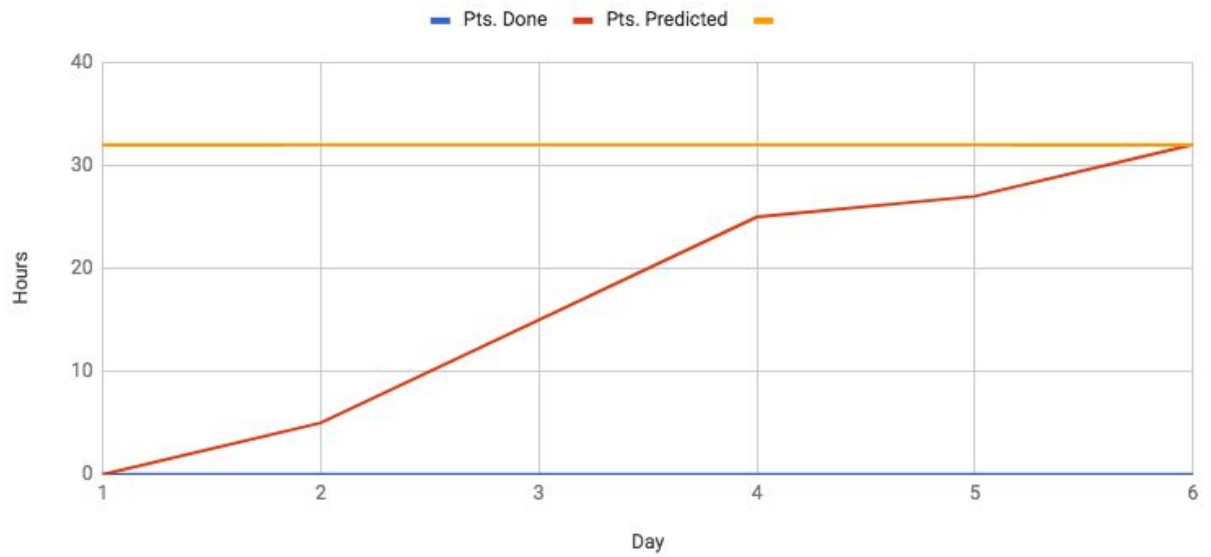

- Vincent Yao: Product Owner
- Srinija Godavarthi: Developer
- Jun Jie Mo: Developer
- Wesley Shih: Developer
- Jeffrey Hui: Developer
- Mark Ramalingam: Scrum Master

Initial Task Assignment:

- Vincent: User Story 1: Firebase and MongoDB integration
- Srinija: User Story 1: MongoDB set up
- Jun Jie: User Story 2 : filters
- Jeffrey : User Story 2 : display subscription
- Wesley: User Story 1: Improving UI for listings
- Mark: User Story 1: Improving UI for listings
