Acceptance Document

Product Name: Split

Team Name: Subscription Splitter

Release Name: Sub-Split1.0

Release Date: March 20, 2018

Revision Number: v1.0

Revision Date: N/A

High level goals/User Stories Achieved:

- Implement a login and sign up page that is secure by using Passport-local.

- Prevent an unauthenticated user from creating a group, and ensure no duplicate users when authenticating.
- Setup routing from webpage to webpage with the Express framework.
- Create a homepage to display all the groups available.

- Create a responsive grid using Bootstrap to encapsulate and display all group data.

- Allow users to create their own subscription service groups.

- Establish authentication and permissions for users to be able to delete and edit only their own posts.

- Permit users to leave comments/reviews about their experiences, and also provide contact information.

- Implement error handling and sanitization of input using Express sanitizer, to provide further security from harmful script tag.

List of Bugs

- We haven't placed restrictions on the fields when creating groups, so we're able to publish empty comments and groups- which we need to restrict.

Restrictions:

- Only the user that created the group can delete it and edit it.

- A user cannot leave a comment or join a group without creating an account or logging in.

- When a user tries to create an account, if an already existing username is in place, they will be prompted to create a different username/account.
